Subject: Transportation Services New Dispatch System
Date: Tuesday, January 27, 2015 4:02:00 PM

Transportation Services is excited to announce the launch of their new dispatch software, Agile Fleet Commander. With Agile Fleet Commander requestors and drivers will be able to make, change or cancel reservations 24 hours a day 7 days a week. This exciting new change goes into effect on February 1, 2015.

With this software change there will be a need for all requestors and drivers to create a profile in the new dispatch software. This is a one-time set up that is required prior to processing reservations on line. Users of the system need to allow 24 hours for the initial set up prior to making the first reservation. The sign up is easy and can be found at [Agile Fleet](#) . Users will use their net id and sign on to gain access to the site. Once set up the requestor and driver can look at all reservations both past and future. Reservations can be made from your smart phone, iPad or computer.

Transportation Services encourages all users and requestors to sign up as soon as possible, if you have not done so already. If you have any questions, please contact Kathy Wellik at 515-294-1657. Thank you for your business and our department looks forward to assisting you with your business transportation needs.
