Accessories and the New Toshiba Models

e-STUDIO 2510AC series

e-STUDIO 5015AC series

e-STUDIO 5018A series

e-STUDIO 7516AC series

e-STUDIO 8518A series

With the latest product introduction, there are new accessories and common accessories. This document is intended to convey important details about the accessories as they relate to these new models.

Document Feeders, Finishers, LCFs, Pedestals & Paper Handling Accessories

All of these accessories are common with the predecessor models and completely interchangeable. To proactively meet upcoming environmental and safety regulations both here in the US and elsewhere in the world, certain affected accessories will be modified and phased-in as current inventories are depleted. There is no cosmetic or functional difference in these accessories. The new accessories will be identified with a “B” added to the suffix of the part number.

Fax Card (GD1370N)

The original fax card (GD1370) has been modified to address upcoming FCC regulations. The new card will be identified with an “N” added to the suffix of the part number and phased-in as current inventories are depleted. There is no functional difference. Both cards are 100% interchangeable.

USB Hub (GR1310)

e-STUDIO2010AC/2510AC & 2018A/2518A/3018A – No internal USB Port (like their predecessors) – Add hub whenever adding card reader or Wi-Fi option to these models. For the rest of the e-STUDIO5015AC and 5018A Series models there is one (1) conventional internal USB port. Add hub ONLY when adding both card reader AND Wi-Fi option.

For the e-STUDIO7516AC and 8518A Series models (like the predecessor models) the USB hub is built into the inside of the MFP standard.

4GB Memory Option (GC1410)

The 4GB Memory Option (GC1410) is only applicable for the 2010AC/2510AC & 2018A/2518A/3018A.

e-STUDIO2010AC/2510AC – Add the GC1410 when adding any embedded solutions including Elevate, e-BRIDGE Plus apps, embedded OCR, Multi-Station Print or XMedius Fax Solution.

e-STUDIO2018A/2518A/3018A – Add the GC1410 when adding the MR4000 (or MR4000B), Elevate or any embedded solutions including e-BRIDGE Plus apps, embedded OCR, Multi-Station Print or XMedius Fax Solution.

Accessory Tray (GR1330) & 10-Key Option (GR1340)

These options were modified to address the larger front panel on the new models. They are not interchangeable with the previous models.

Card Reader Holder (GR1320)

This option was modified to address the larger front panel on the new models. It is interchangeable with the previous models, however the older card reader holder (GR1290) will not work on the new models.

FIPS HDD (GE1230)

The Self-Encrypting Drive with Data Overwrite in these MFPs meets HCD-PP certification requirements which are replacing Common Criteria ratings and exceed Department of Defense requirements. The optional FIPS 140-2 Validated drive is available for those particular customer environments that only recognize this specific standard.
